

Business Mentoring

Women In Business

MENTORING PROVIDES A STEP IN THE RIGHT DIRECTION

Join a group of business women in your area and learn practical business strategies, network and improve your business success.

The Women in Business Mentoring Program brings fundamental knowledge to achieve business success with the aid of co-operative learning and mentor guidance.

Its proven methodology offers a combination of five business education workshops over five months, two networking events and 10 hours of mentoring to assist you with your business growth. At the end of the Program, participants will have developed an appropriate business plan, which covers the goals and objectives of the business.

For many graduates, their business is the realisation of a life-long dream, the chance to build their own success.

The networking and peer support that is created during the workshops is one that often continues after the Program has completed. The Program offers an empowering environment where women feel comfortable to discuss their business issues and offer solutions to each other.

Women in Business offers long-lasting business skills, online discussion forums and sessions for relevant and real issues coupled with networking opportunities with other like-minded female business owners.

Program components

Workshops; tailored to respond to the current and real issues that affect you as business owner, focusing on business growth. Topics include: Business Planning; Marketing; Finance and two optional business topics.

Business mentoring; Participants are matched with an experienced business mentor, providing an opportunity to discuss any issues that you may be facing.
