

Enabling TLS 1.0 for Online Payment

Internet Explorer

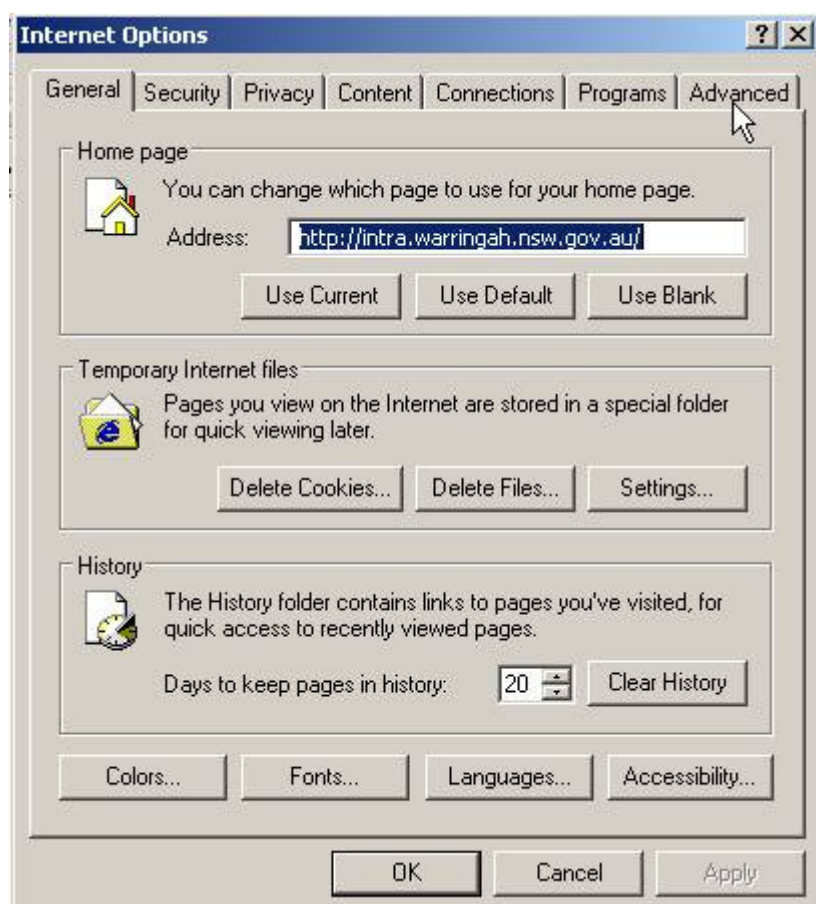

1. Click on the **Tools** from the menu bar at the top of the screen in your Internet Explorer.

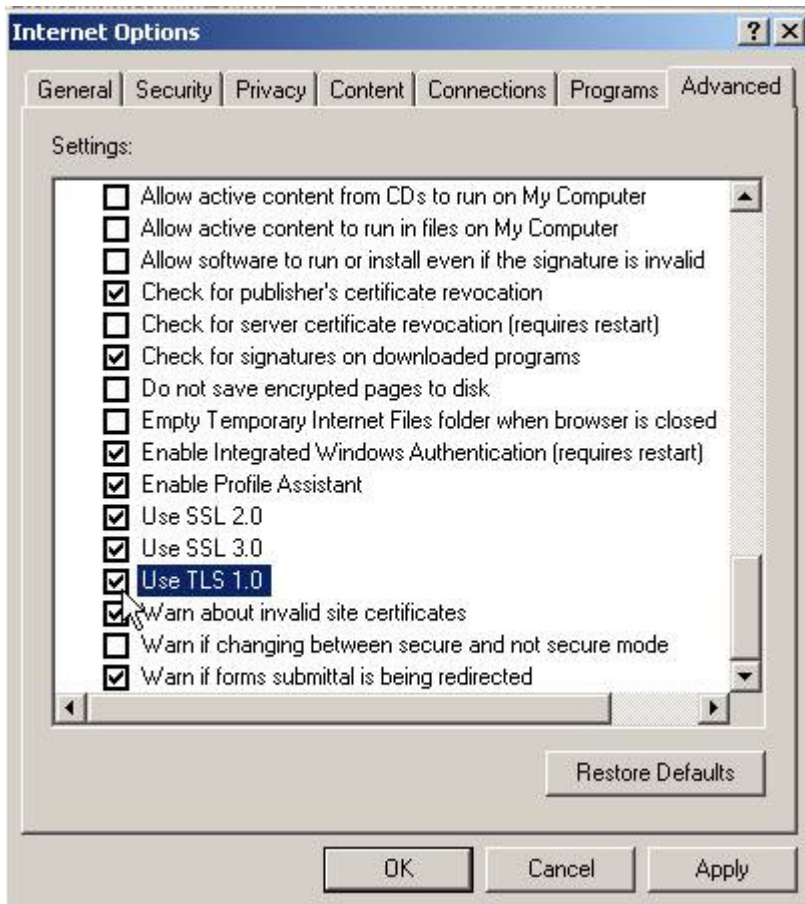

2. In the drop down box, select **Internet Options**, a smaller screen - **Internet Options** will pop up.

3. Select the **Advanced** tab

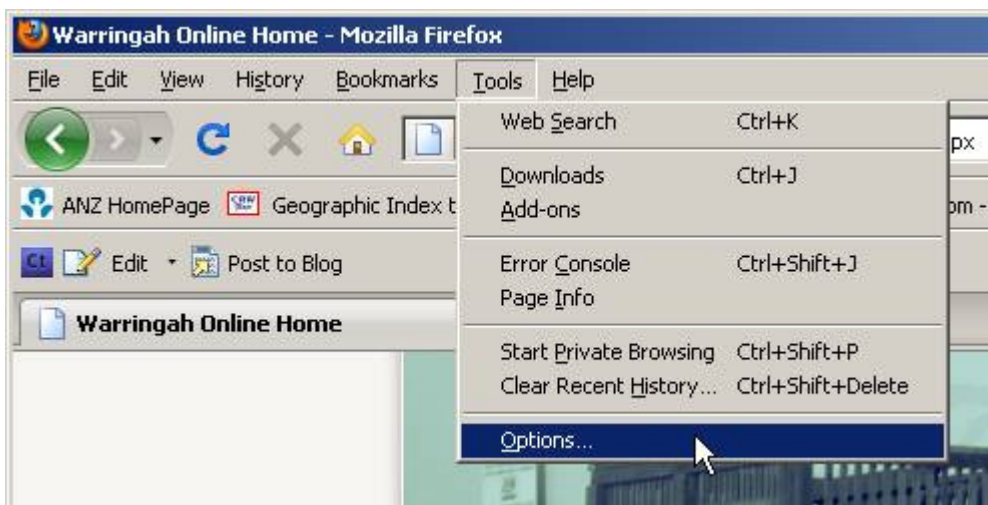

4. Scroll down until you see the Use TLS 1.0 checkbox. Click on the box to select it, then click the OK button to enable the TLS 1.0 option. Now, you can start with your online payments.

Firefox Browser

1. Click on the **Tools** from the menu bar at the top of the screen in your Firefox.

2. In the drop down box, select **Options...**, a smaller screen - **Options** will pop up. With in the **Options** screen, click on the **Advanced** icon, and click on the **Encryption** tab, then click on the **Use TLS 1.0** checkbox. Click the OK button to enable the TLS 1.0 option. Now, you can start with your online payments.
